

CAMERA
lady

The image features the text 'CAMERA lady' in a stylized, digital font. 'CAMERA' is in a bold, blocky, white font with a red and blue glitch effect. 'lady' is in a white, cursive script font, also with a red and blue glitch effect. A white game controller icon is integrated into the letter 'A' of 'lady'. The background is dark purple with various digital effects, including white squares with red and blue borders, and a white diagonal line at the bottom right.

We turn dreams into reality

Backpack

- When selecting implanted synthetic hair option,
wig is not included in the package

To:

How to Take the Doll out from Package

- Bring out all the equipments inside the backpack (protecting materials, head and other accessories), make sure that only the body and towel are left inside the cardboard.
- Now you have to bend your girl's elbows to about 90 degrees (make sure you bend them in the right angle).
- Same for your girl's legs - you have to bend the legs to about 90 degrees as well.
- Bearhug your girl and take her out from the magic box.

Range of Skeleton Movement

- As you can see from the picture, your girl is posable by having joints everywhere inside her body. The rotation/stretching range of the joints are different in terms of different body parts.

To:

Cleaning Instruction

- During the whole cleaning process, we recommend you to lay your doll on bed with a towel. Warm water and shower gel (without chemical ingredients) is always required when taking shower for your girl. Wash supplies are good for washing up the wig/hair (made of synthetic fibre).

Cleaning Instruction

- Baby powder is always helpful for reducing tackiness of silicone.
- Your girl should be cleaned monthly if they are not stored away from dust/dirt.

To:

Cautions

- Do not apply too much pressure on the skin or skeleton.
- Do not use a hair dryer or any other heating device on your doll.
- Do not let the doll wear dark clothes for a long time, and new clothes should be washed before wearing to avoid staining problems.
- Socks should be put on the feet before wearing shoes to avoid staining problems.
- Staining is not easy to remove. It is not recommended to use stain removal cream, which will destroy the doll's makeup.

Cautions

- Do not soak the doll in water. It will make the skeleton rust, or will produce odor due to long-term water accumulation.
- Do not keep the joints bent for a long time. It may make the doll extrude irregular texture, please try to restore each joint to a non-stressed state after display or use, such as lying down or choosing a position with little force.
- Do not use too viscous oil paste color. It will be difficult to clean.
- When removing makeup, please do not apply forcefully, you can use soapy water or makeup remover to wipe gently.
