

Precautions

- Do not bend its arms and legs for a long time, or place it in sitting posture or other postures not set when it exits the factory.
- For the no-standing dolls, do not place it in standing posture.
- Do not bend its legs to 180°(that means, the line position).
- Do not put its arms upward.
- The standing for the non-standing version will get the frame of the feet to penetrate into the skin and exposed outside.
- Please put it in the appropriate posture when it exits the factory as soon as possible.
- It could be dyed easily because of the specialized materials, therefore, do not dress it with deep-colored clothes. The staining cream could only treat the mild dyeing, and the large scale dyeing cannot be totally eliminated easily .
- Do not pull water into the vagina
- Do not wash its face in a large scale, and you could use the cotton stick with cleansing oil to rinse the face slowly when there is stain on the face.
- Do not contact knives or other sharp articles with its skin, otherwise scratch may happen. As the material composing it are flammable, do not put it into fire, and shall keep it away from fire.
- Do not disinfect or cleanse who are easily allergic should accept the tests of the materials, body powder and cosmetics before use. Those who are allergic to this material should not buy it or use it.

- It is suggested that the user should ask a piece of material from the manufacture for test before buying it, and may buy it after making sure that you are not allergic to this material.
- Do not store it in standing posture.
- If the eyes look different, you need adjust the eyeballs with hands(pushing -in will make the eyes look smaller and drawing-outward will make the eyes look bigger)
- It's better choose the wigs with white interior nets when the user needs wigs for the doll.
- If the nail tips of the doll drop, stick with a little 502 (super glue).
- Please do not kiss the doll or lick and bite the body of the doll.
- When installing the insert vagina, please apply lubricating liquid (shower gel or lotion) to the vagina and its inside of the doll, and then open its legs completely (to a split position) so as to insert the vagina into the body of the doll successfully.
- If the original eyelashes are destroyed, replace with commercially available false eyelashes.
- If the eyelashes of the doll drop, stick them with commercially available eyelash glue or 502.

Cleaning & Maintenance

Cleaning Method for the Regular Version:

For the regular doll, the bathing should be in the clean water with a temperature of below 40°C。 The shower gel, soap, washing powder and the detergent could all be

used to making the cleaning. When it comes to the stubborn stains, please wipe it with cleansing oil or ask for white oil from the manufacture.

Cleansing Notices:

No water shall enter the nozzle in the neck, otherwise rust may occur. And the use and beauty will be affected. Th vagina and anus could be cleansed repeatedly with the one-time cleansing tool provided by the manufacture. Do not put the doll's vagina under the running water for cleansing.

Maintenance:

The doll should be bathed every 10-20 days. Apply the body powder after the bath, to prevent it from breaching because of the oil. Pressing marks may leave on the doll if one side is pressed for long time, and it may recover few days after placing the pressed side upward.
